DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (DSM)** is the national standardisation and accreditation body.

The main function of the Department is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards are developed through consensus by committees which comprise of balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject in hand. These standards where appropriate are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 (Act 549). Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

The Department of Standards appoints **SIRIM Berhad** as the agent to develop Malaysian Standards. The Department also appoints SIRIM Berhad as the agent for distribution and sale of Malaysian Standards.

Committee representation

The Electrotechnical Industry Standards Committee (ISC E) under whose supervision this Malaysian Standard was developed comprises representatives from the following organisations:

Department of Standards Malaysia
Federation of Malaysian Consumers Association
Federation of Malaysian Manufacturers
Jabatan Bekalan Elektrik dan Gas
Jabatan Kerja Raya
Malaysian Electrical Appliances and Distributors Association
Malaysian Electric Cable and Wires Association
Ministry of Domestic Trade and Consumer Affairs
Pusat Tenaga Malaysia
Suruhanjaya Komunikasi dan Multimedia Malaysia
The Electrical and Electronics Association of Malaysia
The Institution of Engineers, Malaysia
Universiti Teknologi Malaysia

The Technical Committee on Electromagnetic Compatibility (EMC) which developed this Malaysian Standard consists of representatives from the following organisations:

Federation of Malaysian Manufacturers
Jabatan Bekalan Elektrik dan Gas
Ministry of Domestic Trade and Consumer Affairs
SIRIM Berhad (Secretariat)
SIRIM QAS Sdn. Berhad
Suruhanjaya Komunikasi dan Multimedia Malaysia
Tenaga Nasional Berhad Research Sdn. Berhad
The Electrical and Electronics Association of Malaysia
The Institution of Engineers, Malaysia
Universiti Teknologi Malaysia

NATIONAL FOREWORD

This Malaysian Standard was developed by the Technical Committee on Electromagnetic Compatibility (EMC) under the authority of the Electrotechnical Industry Standards Committee.

This Malaysian Standard is identical with CISPR 16-2: 1996, 'Specification for radio disturbance and immunity measuring apparatus and methods - Part 2: Methods of measurement of disturbances and immunity, and its Amendment 1: 1999', published by the International Electrotechnical Commission (IEC). The text of the IEC Standard is recommended for publication as a Malaysian Standard without deviation. However, for the purpose of this Malaysian Standard, the following apply:

- a) in the source text, "this IEC Standard" should read "this Malaysian Standard";
- b) the comma which is used as a decimal sign (if any), to read as a full point; and
- c) the basis CISPR 16-2 is printed in English and French languages. However, only the English version on odd pages is retained for this Malaysian Standard.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.

NOTE. IDT on the front cover indicates an identical standard i. e. a standard where the technical content, structure, wording and presentation of a Malaysian Standard is exactly the same as in an International Standard or is identical in technical content and it may contain the minimal editorial changes specified in clause 4.2 of ISO/IEC Guide 21.
