FOREWORD

This Malaysian Standard was developed by the Technical Committee on Business Continuity Management under the authority of the Organisational Management Industry Standards Committee.

MS 1970, *Business Continuity Management-Framework*, has been developed to provide recommendations for organisations to design, develop, implement and maintain business continuity management plans. This standard is not meant to be prescriptive. It however recommends best practices of business continuity planning.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.
