DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (STANDARDS MALAYSIA)** is the national standards and accreditation body of Malaysia.

The main function of STANDARDS MALAYSIA is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject at hand. To the greatest extent possible, Malaysian Standards are aligned to or are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

For the purposes of Malaysian Standards, the following definitions apply:

Revision: A process where existing Malaysian Standard is reviewed and updated which resulted in the publication of a new edition of the Malaysian Standard.

Confirmed MS: A Malaysian Standard that has been reviewed by the responsible committee and confirmed that its contents are current.

Amendment: A process where a provision(s) of existing Malaysian Standard is altered. The changes are indicated in an amendment page which is incorporated into the existing Malaysian Standard. Amendments can be of technical and/or editorial nature.

Technical corrigendum: A corrected reprint of the current edition which is issued to correct either a technical error or ambiguity in a Malaysian Standard inadvertently introduced either in drafting or in printing and which could lead to incorrect or unsafe application of the publication.

NOTE: Technical corrigenda are not to correct errors which can be assumed to have no consequences in the application of the MS, for example minor printing errors.

STANDARDS MALAYSIA has appointed **SIRIM Berhad** as the agent to develop, distribute and sell Malaysian Standards.

This Malaysian Standard, which had been approved by the Material and Chemical Industry Standards Committee and endorsed by the Council of the Standards and Industrial Research Institute of Malaysia (SIRIM) was published under the authority of the SIRIM in 1975.

SIRIM wishes to draw attention to the fact that this Malaysian Standard does not purport to include all the necessary provision of a contract.

This Malaysian Standards are subject to periodical review to keep abreast of progress in the industries concerned. Suggestions for improvements will be recorded and in due course brought to the notice of the Committees charged with the revision of the standards to which they refer.

Committee representation

The Material and Chemical Industry Standards Committee under whose supervision this Malaysian Standard was prepared, comprises representatives from the following Government Ministries, trade, commerce and manufacturer associations and scientific and professional bodies

Federation of Malaysian Manufacturers
Institution of Engineers (Malaysia)
Malayan Plastic Association
Malayan Rubber Goods Manufacturers Association
Malaysian Institute of Architects
Malaysian Institute of Chemistry
Malaysian Paint Manufacturers Association
Malaysian Scientific Association
Ministry of Defence
Ministry of Health (Institute for Medical Research)
Ministry of Labour and Manpower
Ministry of Power, Technology and Research (Department of Chemistry)
Ministry of Primary Industries (Mines Department)
Ministry of Trade and Industry
Ministry of Transport and Works (Public Works Department)
Malaysian International Chamber of Commerce and Industry
Rubber Producers' Council of Malaysia
Rubber Research Institute of Malaysia
University of Malaya

The Technical Committee on Metal and Ores which prepared this Malaysian Standard consists of representatives from the following member organisations:

Institution of Mineral Engineers
Iron and Steel Industry
Ministry of Power, Technology and Research (Department of Chemistry)
Ministry of Primary Industries (Geological Survey Department)
Ministry of Primary Industries (Mines Department)
States of Malaya Chamber of Mines
Tin Smelting Industry
University of Malaya

MS 303 : 1975

FOREWORD

This Malaysian Standard Specification for Foundry Pig Iron was prepared by the Technical Committee on Metal and Ores under the authority of the Material and Chemical Industry Standards Committee.

This Standard is based essentially on the material used by the various foundries in this country.

In addition, references were also made to the appropriate specifications of the following organizations:

South African Bureau of Standards;

Indian Standards Institution;

American National Standards Institute;

Japanese Standards Association.
