**CLEANING PERFORMANCE - COMMERCIAL AND PUBLIC BUILDINGS**

---

**(1) C.2, page 35, Cleaning performance calculation**

To replace the calculation for percentage of performance as follows:

$$\text{Percentage of performance} = \frac{y}{x} \times 100\%$$

where

$y$  is the total score (see Table C.1); and

$x$  is the number of elements inspected (see Table C.1).
