AMENDMENT OF MALAYSIAN STANDARD

MALAYSIAN STANDARD

MS 814:2007

Palm oil - Specification (Second revision)

Clause 4, Page 2, Table 1

To change the value of observed range of apparent density kg/l, at 50 °C and Refractive index, n_D 50 °C as follows:

Table 1. Guideline identity characteristics for palm oil

Identity characteristics	Observed range	Mean	Standard deviation
Apparent density, kg/l, at 50 °C	0.889 - 0.895	0.890 50	0.000 2
Refractive index, n_D 50 °C	1.454 - 1.456	1.454 3	0.000 2

NOTE. The identity characteristics of processed palm oil differ in no significant ways from those of crude palm oil with the exception of carotenoids.
